

SAVESTATION[®]

Sponsoring a SaveStation

SaveStations provide the public with quick, easy access to life saving defibrillators – indoors and out!

Whether you are a large corporate sponsor, small community organization, or local individual - we can all play a role in increasing access to AED's everywhere.

Extra Exposure

Sponsors have the opportunity to visually showcase their generous contribution on the SaveStations, as well as across promotional & educational materials.

SaveStations are located in areas that would typically not be accessible via standard advertising avenues. Such as within a school, on the grounds of a sports field, and in the middle of a market square.

Unique Opportunity

As an Authorized SaveStation Distributor we can assist in connecting sponsors with SaveStations across the country. This is a unique opportunity to invest in the health and safety of our communities while also gaining valuable exposure. Join us, together we can save lives!
